Alberta

EN

The peculiarity of this model is the combination of discreet nobility of veneered and expressive acrylic surfaces with a high degree of gloss. The huge functionality of the kitchen is ensured by the presence of a large number of open and closed shelves. Handle profiles integrated with the fronts ensure the integrity and harmony of the interior. Simple design and neutral shades create lightness and coziness that perfectly matches the design of a small apartment.

INTEGRO

collection

*INTEGRO with its integrated into the cabinet facades handle profiles enables your kitchen to look highly fashionable and elegant.
INTEGRO handle profiles allow to create modern and ergonomic design with its straight lines associated with german laconic style.
Furthermore integrated handle profiles have one significant feature as a practical matter: using of them allows you to avoid salient elements on your cabinet doors what makes your kitchen safe and convenient.*

Integrated aluminium handle profiles C-1, C-2, C-3

C-3

*Urban chic.
Modern and cosy kitchen which design is echoing the architecture of present-day
megapolis perfectly fits into the interior of any small apartment.*

*Wall cabinet facades: material acrylic, color ash, C-2 handle
Base cabinet facades: material acrylic, color white, C-1 handle
Worktop: material postforming 38mm thick, color thuja, 3D white edge*

C-1, C-2

Specifications:

ZOV standard cabinet heights are used.

Carcase material - laminated chipboard 18mm thick.

Facades have horizontal handle profile position (handle profile adjusted to cabinet width).

Minimum facade size with handle:

for C-1 handle 130x296mm

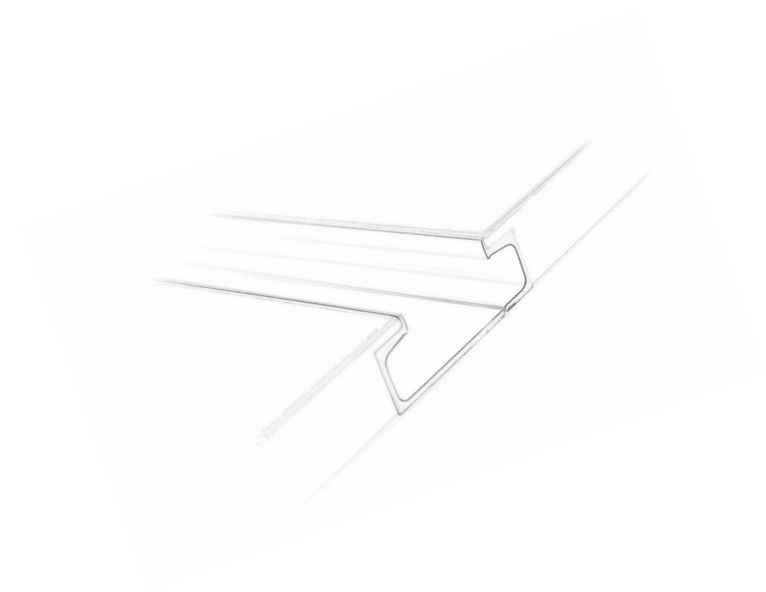

for C-2 handle 130x296mm

Maximum facade size with handle: 2800x1300mm.

Facade material: ACRYLIC (standard, premium), PLASTIC. Facades banded with same color PVC edge.

PLEASE NOTE that handle profiles C-1/C-2 can not be integrated into the facades of the following cabinets:

cabinets with curved and glass facades

Facades with integrated C-2 handle are used for wall and high cabinets:

wall cabinets with 1 or 2 hinged doors; wall cabinets with door opening up (lift systems Blum Aventos HS, HL, HK, HK-S, HK-XS; gas springs). Handle is integrated from the bottom.

wall cabinets with doors folding up (355+355)mm (when using Blum Aventos HF lift system C-2 handle is integrated only into lower facade).

wall cabinets with 2 doors (each 355mm in height) with different opening systems (C-1 handle integrated into upper facade, C-2 handle - into lower facade).

High cabinets with built-in domestic appliance and 2 facade types

Facade with C-2 handle is mounted right above the false facade with integrated handle C-1

In that case minimum height for the false facade with handle C-1 is 50mm

It is also possible to integrate only handle C-1 into facades on high cabinet for built-in domestic appliance

Herewith there is no false facade between built-in unit and upper facade

Thus handle C-1 is integrated into both upper and lower facade

Facades with integrated C-1 handle are used for base cabinets:

base cabinets with 1 or 2 hinged doors (handle is integrated from the top)

base cabinets with drawers (handle is integrated from the top)

C-1 handle can be used for wall cabinets which have 2 horizontally opening facades with separate lift systems for each facade.

In that case C-1 handle is integrated into upper facade, C-2 handle - into lower facade.

«Elegant brevity.

Kitchen where white gloss facades and facades with imitated natural wood grain are combined visually adds some airiness and weightlessness to your interior».

Facades material: plastic Formica, C-1 and C-2 handles

Worktop material: quartz agglomerate, color Bianco, 20 mm thick

Splashback with Schuco aluminium profile: colored glass insert, color white

Splashback with Schüco aluminium profile

Aluminium panel system Schüco (Germany) enables to create combined splashback which perfectly goes together with the other furniture and will be an attractive visual highlight in your kitchen.

Schüco aluminium profiles can be used as runners for different kitchen items (towel and knife holders etc.).

Wall attachment aluminium profile can be installed next to cooktop. High temperatures will not have any harmful effect on it.

Moreover wall attachment aluminium profile will be very much to the point if wiring needs to be hidden.

Inserts for splashbacks:

Laminated glass (4+4mm)

Laminated mat glass

Leatherette + glass

Colored glass (colors of chipboard with glass finish)

Postforming

Chipboard with plastic finish

Acrylic

Maximum size - 2500x900mm

*There is one more option for high cabinets with hinged doors/for integrated refrigerator.
Upper facade comes with C-2 handle, lower facade - with C-1 handle.*

*Corner joint with attached cabinet. Base cabinets for C-1 handles.
Angle unit (ledges) of the same color as facades enables doors to be opened easily. There are no salient elements what ensures the maximum safety.*

Refined aesthetics.

New understanding of monochrome classics with its laconic straight design enables to create a perfect kitchen for modern conservatives.

Wall cabinet facades: material acrylic, color talc, C-3 handle

Base cabinet facades: material acrylic, color graphite, C-3 handle

High cabinet facades: material acrylic, color talc, C-3 handle (vertical position)

Worktop material: quartz agglomerate, color Galaxy, 60mm thick / solid ash treated with oil-wax mixture (color rosewood)

C-3

Specifications:

Facades with C-3 handle.

Certain carcass heights developed especially for INTEGRRO collection are used when mounting facades with C-3 handle.

Height of base cabinets 777mm, depth - 530mm.

Carcass material - laminated chipboard 18mm thick.

ArciTech (Hettich, Germany) drawer systems are used for drawers (color: white, anthracite).

Vauth-Sagel pull-out units (Germany) are installed optionally.

PLEASE NOTE that handle profile C-3 can not be integrated into the facades of the following cabinets:

cabinets with rounded elements

cabinets with curved and glass facades

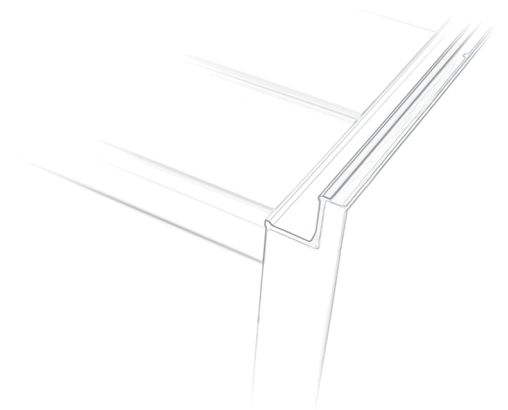

cabinets with mitre/cutoff

diagonal corner cabinets

Number and position of C-3 handle strictly depends on cabinet design.

INTEGRRO collection involves high cabinets with vertical aluminium profile.

Facade material: acrylic, postforming.

Integrated C-3 handle is almost not visible what gives the feeling of wholeness of facade surface. There are no salient elements what ensures the maximum safety when using the kitchen. For easier access to base cabinet handles extra space under worktop and between the facades is provided. For that, into base cabinet side panels decorative slats (same color as facades) are inserted.

Decorative side support with integrated handle

Decorative side support with its unique design and aluminium angle piece along with integrated C-3 handle profile gives your kitchen perfectly complete view.

High cabinets with vertical aluminium profile, depth 570mm

High cabinets with vertical profile have no handles.

Into the high cabinet carcass by means of special aluminium profile decorative slat is inserted which is the same color as facades.

In high cabinets with hinged doors vertical profile can be mounted only on the side opposite the hinges.

If the door is left hinged the profile is mounted on the right.

When designing the kitchen it is important to take into account that 30 mm between high cabinets must be reserved if the vertical profile is intended to be mounted.

*Due to C-3 handle mounting specifics facades are lower than wall cabinet bottom panel by 16mm.
When selecting lift systems Blum Aventos HF/HL it is important to know that closing of facade can cause some inconvenience.*

*Trendy minimalism.
Dynamic design based on united plane, right angles and straight lines. Perfect choice for stylish young family.*

*Facades material: plastic Formica, C-3 handle
Worktop material: quartz agglomerate, color Bianco, 38mm thick
Splashback with Schüco aluminium profile: insert - chipboard with glass finish, color aqua*
